TUF-SKIN VALVES

Sales@UniversalSales.biz

92311 Booth Street ~ Junction City, OR 97448 ~ PH (541) 998-9999 ~ FX (541) 998-9998

Solar Power Station for **TUF-SKIN** Electric Actuated Valves

No Power? No problem!

Our solar powered valve can be controlled by a standard irrigation controller, a timer we provide, a float switch, a wireless relay control system, and many other options!

Inside the cabinet is a 12vdc battery, a solar charge controller, and a 120vac inverter. The Tuf-Skin OM series actuator is powered by the 120vac inverter. The inverter can also power a standard irrigation controller, that can control the Tuf-Skin OM actuator with the use of a relay.

Shown with 8" Lug
Style valve and 36"
Valve Stem Extension.
